

## Deloitte Consulting NLA - HirePro Test Anatomy – Undergraduate Track

The Deloitte Advisory NLA HirePro assessment is designed to evaluate you across multiple skills, with the objective of building a fully rounded profile of your strengths and weaknesses.

### TEST DURATION: 75 Minutes

### NUMBER OF QUESTIONS:

- 40 questions in the Multiple-Choice Questions (MCQ) format
- 2 questions in the Live Code format

### PROCTORING:

This test is fully proctored using video and audio. During the test, your video and audio would be recorded and analyzed to ensure the integrity of the test.

### TEST SUMMARY:

- The test is divided into five sections
- For each section, you will get dedicated time duration (within the overall duration of the test)
- If you run out of time before completing any section, you will be moved forward to the next section automatically
- Once you move to the section ahead, you will not be able to come back to the previous section
- The five sections will present four different varieties of questions as explained below

### TEST SECTION DETAILS

- **Language Skills (English):**
  - This section consists of 8 MCQs and 2 fill in the blank's questions
  - This section will evaluate your ability to understand and use English in the workplace
  - The questions will measure your knowledge of English vocabulary, grammar, sentence construction, sentence arrangement, and overall language comprehension
- **General Aptitude (Reasoning Ability & Quantitative Ability)**
  - This section consists of 10 MCQs in Logical Reasoning and 10 MCQs in Quantitative ability
  - This section will evaluate your general cognitive skills, your reasoning skills, and your ability to work with data
  - Different questions have different Instructions, so you must read and understand the Instruction clearly for each question
  - A few of the questions will be based on a common premise and will appear in sequence
  - Some questions may involve basic numerical calculations, so it is advised to keep a pen and paper handy
- **Technical Skills (MCQ):**
  - This section consists of 10 MCQs
  - This section will evaluate your knowledge in programming, Computer science, Database concepts in the chosen areas
  - This section also will evaluate your programming acumen and programming languages' knowledge
- **Technical Skills (Coding):**
  - This section consists of 2 live coding questions
  - The coding questions evaluate your knowledge of programming language(s) and your ability to write syntactically correct code, and also evaluate your logical thinking and problem-solving skills as well
  - You will need to write code using the provided online editor
  - You will be able to select the programming language of your choice from the given dropdown list. This will include all the commonly used languages like C, C++, C#, Java, Python etc.
  - You will be able to evaluate your code in real time by using the "Compile & Execute" option
  - If the code successfully compiles, then you will be able to see how many hidden test cases your code managed to pass/fail
  - The last version of code you submit will be considered as the final version for evaluation
